

TYPE: PEMB/2x4 HIRE PIGS

Product 6-disc design

Group Separation, batching, displacement and hydrostatic testing

PEMB/2x4 hire pigs size 6" – 36" are designed for product separation, batching, displacement and hydrostatic testing operations.

PEMB/2x4 hire pigs are manufactured with a steel welded body, polyurethane spacers, polyurethane protection noses at each end and a hoisting facility in front.

PEMB/2x4 hire pigs are fitted with 2 polyurethane guiding discs and 4 polyurethane sealing discs which are easily replaceable and create a superior seal.

General function and application

Removal of debris, liquid evacuation, product separation, batching, displacement and hydrostatic testing.

PEMB/2x4 hire pigs are designed for passing 1.5 D radius bends and will traverse full-size branch openings.

PE/MB/2x4 options available

- Gauging plate aluminium
- Spider Nose

Size Nom. (inches)	L (mm)	T (mm)	P2 (mm)	P1 (mm)
6	207	182	61	31
8	271	236	78	40
10	375	340	95	49
12	437	402	101	55
14	487	452	101	55
16	620	540	130	55
18	715	635	160	69
20	755	675	160	69
22	805	725	177	77
