

## TYPE: DUAL PIPELINE PLUG

**Product:** DUAL PIPELINE PLUG  
**Pipe Schedule:** VARIOUS  
**Size Range:** 2" through 24" (larger sizes on request)

It is often difficult to create a safe environment for performing hot work on existing pipelines carrying hydro-carbon resources. **PolyEurope's** Dual Pipeline plug is a simple, reliable and economical tool for providing positive and proven isolation before hot work commences. It is also capable of hydrostatically testing any new weld afterwards.

**PolyEurope's** Dual Pipeline Plugs are presently specified at many Refineries.

For further information please contact our Sales Team.

### General Function and Application

- Double isolation via two tyres.
- Central by-pass facility to vent gasses.
- Can hold up to 30 bar between tyres (76.5 bar on request).
- Will hold a line pressure of 5 bar.g.
- Can be used in a range of pipe schedules.
- Provides a safe working environment.
- Instructions and hydrostatic test certificates supplied.
