Dedicated partner of  
Pigging and Pipeline Products

# Welcome

Established in 1976, PolyEurope bv, The Netherlands is honored to introduce themselves to your company as one of Europe's leading companies in the manufacture, design and supply of high performance pipeline cleaning and testing pigs.

PolyEurope bv located in the city of Tricht - The Netherlands, is having their own research & development centre and allows PolyEurope bv to design custom made exclusive pipeline pigs and/or pipeline related items.

Manufacture of our high performance pipeline cleaning and testing pigs is achieved by assist of fully computer controlled state of the art polyurethane casting and foaming machines.

PolyEurope management team has more than a century of experience in the pigging and pipeline industry.

Substantial investment in production facilities and machinery has put PolyEurope bv at the forefront of the (inter)national pigging and pipeline industry.

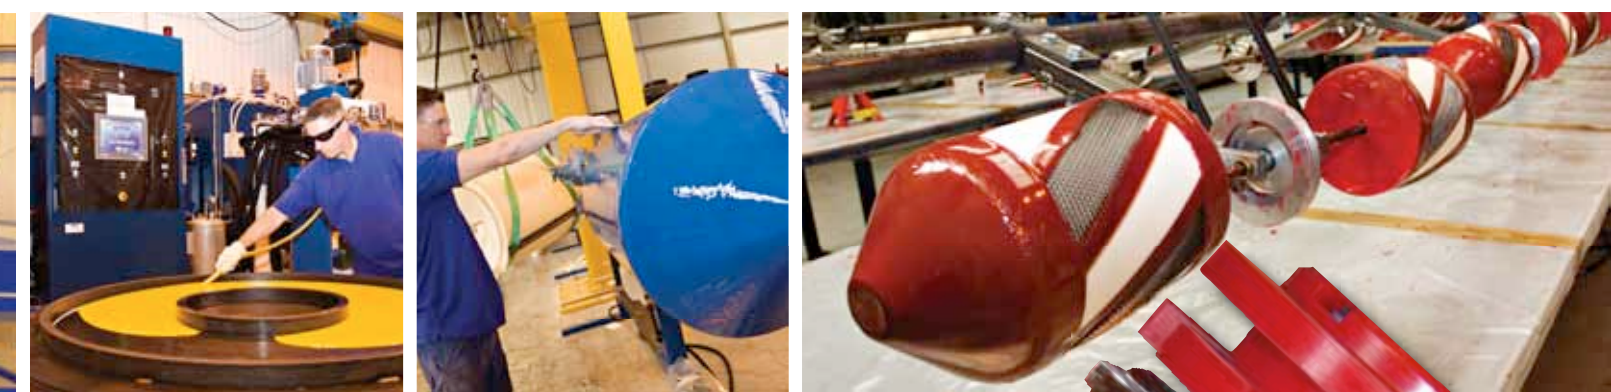

The machine and fabrication workshop facilities means PolyEurope bv is totally self-sufficient.

PolyEurope bv provides standard products and also tailored solutions using AutoCad Inventor design technology.
